

Secure Your Landscape Before a Hurricane or Storm

A complimentary storm preparedness resource from The Greenery, Inc.

PLAN AHEAD

- Walk through your property to assess any areas of concern.

CHECK YOUR TREES

- Check your yard for dead or dying trees and tree limbs. Contact a local tree company to remove any hazardous trees or fallen limbs.

MOVE LIGHT ITEMS INDOORS

- Decorative yard items and light furniture should be moved inside your home. Examples include: Hanging baskets, outdoor furniture, bird feeders, gardening tools, wind chimes, or anything not secured.

SECURE HEAVIER ITEMS

- Group together heavier items that are too large to move indoors. Secure large, potted plants together at the lowest point of your yard, like a hedge or wall, to help block wind. If you cannot group them together, try securing them with ropes or stakes.

LAY STONE ITEMS DOWN

- Heavy items made of stone, like benches and bowls, should be laid flat to prevent them from becoming projectiles. If you have a stone bird bath, don't forget to remove the top off the pedestal.

CUT POWER TO SPRINKLER AND LIGHTING SYSTEMS

- Cut off power for your outdoor lighting and sprinkler systems or irrigation system.
